District 4:	Montcalm County, except Bloomer, Crystal and Evergreen townships	Laverne Hansen	Lisa Johnson
District 5:	Gratiot and Saginaw counties, except Bingham, Duplain and Greenbush townships in Clinton County, and except Bloomer, Crystal and Evergreen townships in Montcalm County	Cara Evans	Peggy Pirhonen
District 6:	Clare and Isabella counties	Ed Oplinger	Dick Donley
District 7:	Mecosta and Osceola counties	Dean Floria	Patti Ferris

“Throughout our history, you’ve shown that you trust us to get the job done, and we don’t take that trust lightly.”

On the cover: History and trust.

Your cooperative was founded to serve rural folks (inset left) who did not have access to reliable electric service at a competitive price. Built in 1941, our Portland office (inset right) is being renovated to continue serving our members well into the future. It is the continued trust of our membership that allows us to invest in the technologies of tomorrow, such as renewable energy solutions (large photo).

At Right, Your Tri-Country Electric Cooperative Board of Directors:

Seated, from left: Laverne Hansen, Carl Morton, Wayne Swiler
Standing: Ed Oplinger, Dean Floria, Mark Kappler (General Manager), Cara Evans, Phil Conklin

Reliable electric service at a competitive price

Providing that has been our mission since the late 1930s, as we've been reminding ourselves, and you, this year at the district membership meetings. With our 75th anniversary coming up in March 2012, the history of HomeWorks Tri-County Electric Cooperative has been on our minds.

President Franklin Roosevelt got us started by signing the Rural Electrification Act in 1935, hoping to ensure every family in America had the quality of life made possible by access to affordable electricity. When the big power companies passed on the opportunity to move into rural areas, farmers got together to build their own power companies.

We found power supply from hydros, small towns, and even other farmers who owned

generators with excess capacity, before building our own generators, and finally joining with other electric cooperatives to form our own generation and transmission cooperative.

It's interesting, studying our history, because we can see how issues, whether technical or political, keep repeating themselves over the years.

But we can't focus on our past to the point that we neglect our future. Technology, on your side of the meter and ours, is changing our jobs at a fast pace. And the political winds in Lansing and Washington, D.C., could power a wind farm - if we could just harness the shifting winds.

We not only have to keep up, we must stay ahead of the trends and issues if we're going to provide the service you need.

Throughout our history, you've shown that you trust us to get the job done, and we don't take that trust lightly. You elect a board of directors and rely on them to set the policies that guide our staff in operating the cooperative.

You turn out in ever-increasing numbers for the district meetings, and the conversations we hold at those meetings also help us set Tri-County's priorities.

Which always begin and end with: Providing reliable electric power at competitive prices.

Carl Morton,
Board Chairman

Mark Kappler,
General Manager & CEO

Balance Sheet

HomeWorks Tri-County Electric Cooperative

Year Ended December 31,

(in Thousands)

Working to Provide Reliable Service

Planning the work
A line crew from Blanchard reviews a project.

Reaching high
HomeWorks crews are working across the system to maintain and upgrade power lines to assure you reliable service.

Assembling a pole
A Portland line crew prepares a new pole before it's installed as a replacement.

Right-of-way clearing
Cutting trees out of the power line rights-of-way is helping reduce outages.

Final Phase of Facilities Upgrade

This is the final phase of an eight-year facilities upgrade that began with a garage at Portland to keep the equipment under cover, protecting that big investment. We continued at Blanchard with a garage for the equipment used from that office, and a renovation of the Blanchard office to make better use of the space we had. This final phase is bringing the Portland office, built in 1941, up to code and making it more energy efficient, as well as connecting the office building to the Operations Center to work more efficiently.

Energy Optimization Programs

Energy optimization means using energy wisely. HomeWorks offers many energy efficiency programs designed to reduce the energy use of participating members by encouraging investment in energy efficiency measures. These programs are funded through an Energy Optimization Surcharge on member's monthly electric bills (as required by Michigan Public Act 295 of 2008).
